• How will the new inter-fuel competition and technologies impact future generation, transmission and distribution?

Energy’s Grand Challenges
• Featuring plenaries with leading experts on Cyber Security and Energy
• Geopolitical Hot Spots
• Game Changing Energy Technologies from MIT
• What are the major threats and opportunities in meeting the significant energy needs of a growing world?

Energy Innovation Pioneers

Energy Innovation Pioneers program features CEOs of dynamic early stage companies whose technologies offer great promise. The program screens and selects candidates based on the invention and creativity, feasibility and timeliness, scalability and the quality of management team. It includes presentations by each CEO on their company’s technology during Strategic Dialogue Breakfasts held daily. It also includes the Innovation Pioneer Showcase, held concurrent with the main conference program, in which conference attendees can meet CEOs from current and previous Innovation Pioneer during a series of 30 minute informal sessions.

CERAWeek 2015 includes some 20 pioneers from oil, gas, power, renewables, environmental and energy efficiency technologies.
