OVERVIEW

Trusted information that supports critical decisions

The global defence and security communities and the industries that support them are facing growing uncertainty and an unprecedented volume and variety of threats.

Only Jane's Defence Equipment & Technology Intelligence Centre provides world-renowned information on the world's air, land, naval, and joint defence platforms, systems, and weapons. Its content underpins market-leading products such as Jane's All the World's Aircraft and Jane's Fighting Ships. Delivering accurate and up-to-date reference information and news articles on global military equipment and technology – including specifications, programme information, customers, and contractors – defence organisations and businesses trust Jane's to provide information that supports critical decisions.

Understand military platforms, weapons, and systems with world-renowned information

BENEFITS

Use technical, operational and commercial news to support key activities

This unrivalled resource provides technical, operational, and commercial news and insight into global defence platforms, systems, and equipment in production, in service, and under development, supporting a range of key activities including capability analysis, threat assessment, competitor analysis, product development, and defence procurement.

Independent expert analysis delivers essential insight

Subscribers receive Defence Insight Reports, which combine reference, budget, and forecast information to deliver subject-specific analysis of the most significant defence equipment and technology issues and developments over the previous quarter. In addition, all subscribers receive access to regular Online Intelligence Briefings delivered by subject matter experts.

Easy access and powerful integration saves time and provides richer content

Jane's understands that to get value from market-leading content and insight it is vital that it is available whenever needed. That is why we provide a choice of channels from our online portal, to disk, or ftp site to ensure that content is conveniently accessed by individual customers with different needs and workflows. The ability to combine searches across different Intelligence Centre subscriptions and integrate Jane's information with your own systems adds efficiency to research, removes complexity, and delivers the ability to both drill down to detail and see the big picture more easily.

ACHIEVING CRITICAL OBJECTIVES

Stay at the forefront of developments

Government agencies, armed forces, and businesses rely on Jane's to support their understanding of the global defence landscape and to advance their decisions and processes in achievement of critical objectives.

You can trust Jane's Defence Equipment & Technology Intelligence Centre to provide the information and insight that will keep your organisation at the forefront of developments, enabling you to perform key tasks more effectively.

Conduct all-source analysis

Comprehensive and reliable open-source intelligence on key aspects of defence equipment in service and under development means that Intelligence Analysts can trust Jane's to provide credible, up-to-date information to support critical all-source analysis and reporting.

Strategise and plan

Detailed current and future defence equipment capability information supports horizon-scanning, scenario building and short, medium and long term planning activities.

Compare, benchmark and procure

Procurement teams can make decisions confident in the knowledge that they are based on reliable platform, subsystem, and technology specifications and performance data.

Research markets

In-depth programme and development data enables A&D industry market research and analysis teams to conduct accurate market sizing, market scoping, and competitor analysis activities.

Partner, team and acquire

Business development and strategy professionals benefit from access to tens of thousands of articles detailing platforms, subsystems and technologies in service and under development which reveal downstream capability gaps and revenue opportunities. Contractor information guides effective partnering, teaming, and acquisition activities.

Develop products and technologies

Huge amounts of information on existing and future technologies enable engineering teams to conduct effective benchmarking and drive the development of profitable future products and technology enhancements.

CURRENT, COMPREHENSIVE INFORMATION

Base your critical decisions on the most up-to-date content available

Only with Jane's Defence Equipment & Technology Intelligence Centre can you be confident that you have access to the most up-to-date defence reference content available.

With global news and analysis of defence equipment and technology developments, defence procurements, defence industry issues, and military deployments, and with over 170 news, analysis, and daily insight articles published online every week, Jane's Defence Equipment & Technology Intelligence Centre represents a timely and reliable window to the world of defence.

Currency ensured by a rigorous update schedule

In order to ensure currency, every reference article in the database is reviewed according to a rigorous update schedule. In addition to this, new articles are added and existing articles updated as and when developments occur.

See the complete picture across all key defence subject areas globally

Jane's Defence Equipment & Technology Intelligence Centre delivers comprehensive and reliable reference information globally across all core defence sectors.

- Air & Space
- Land
- Sea
- Platforms
- Weapons
- C4ISR & Mission Systems

Over a year* the team reviewed, verified and updated over 28,000 reference articles, and added over 1,200 new entries.

*12 month period September 2016 to August 2017

EXCLUSIVE INSIGHT

Get exclusive context with Defence Insight Reports

Subscribers to Jane's Defence Equipment & Technology Intelligence Centre receive quarterly Defence Insight Reports that integrate news, analysis, reference, and forecasting content on a subject-by-subject basis. These reports provide you with exclusive additional insights into defence issues of particular global or topical significance.

Delivering key context and incisive analysis of the factors that most affect the global defence landscape, these high-value reports represent a convergence of Jane's capabilities that includes budget and market forecasting, procurement programme analysis, equipment and technology assessment, and industrial analysis.

Gain unique insight from Online Intelligence Briefings

Subscribers also receive complimentary access to the highly regarded Jane's Intelligence Briefings series. These briefings are delivered by Jane's subject matter experts on a wide range of key defence and security topics. Recordings and slides are made available for playback and viewing for those customers who are unable to join a live session.

POWERFUL ANALYTICS

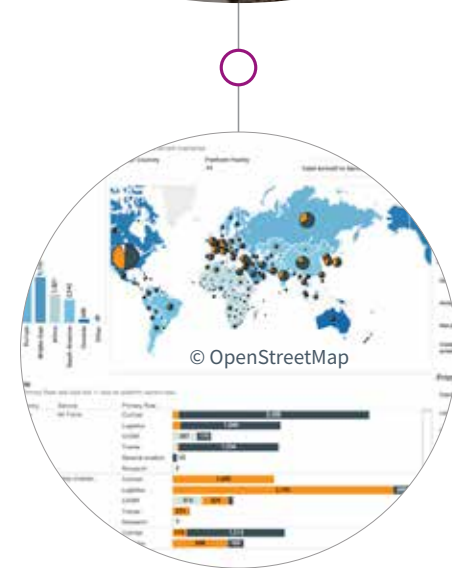

Visualise. Discover. Share.

As part of our ongoing commitment to delivering additional value, Jane's provides a series of Data Analytics Modules to enable Intelligence Centre customers to visualise, discover, and share information in exciting new ways.

The Data Analytics Modules deliver filtering, data visualisation, and graphics export capabilities which are genuinely intuitive and very simple to use. Each module contains a number of interactive dashboards which support faster, more effective analysis, and knowledge sharing.

The Data Analytics Module for Jane's Defence Equipment & Technology Intelligence Centre incorporates a range of analytics dashboards that enable capability and capability gap analysis, threat assessment, market analysis, and competitive analysis.

strategic planning, and procurement

ENABLING PARTNERSHIP

Focused on maximising the return on your investment

Jane's views every subscription as an investment for the subscriber organisation, and provides support to help ensure that the return on that investment is maximised. As a trusted independent partner everything we do is focused on meeting and exceeding subscriber expectations, from product and service development, to ensuring that they can access content in the format that suits them best, online or offline.

Integrate data and information quickly and easily

Jane's Defence Equipment & Technology Intelligence Centre content is available in multiple formats to align with user workflows. Online access provides users with instant access to the very latest content, with new content and updates available immediately. Offline access delivers the same content via disc or ftp site in a way that enables users to integrate data and information quickly and easily into other systems intranets, models, and simulations.

Use structured data to meet offline challenges

Jane's data is available offline as html, xml or structured data, enabling users to query, manipulate, and analyse content with powerful results:

- Search data by specification
- Easily perform like-for-like equipment capability comparisons
- Visualise data in innovative ways
- Integrate data quickly and seamlessly into databases, models and simulators

INCREMENTAL SUPPORT

OSINT Training

Jane's offers a range of OSINT training courses that equip attendees with the latest best practices in order to help national security organisations to maximise their exploitation of open-source intelligence.

Online Intelligence Briefings

Subscribers to Jane's Defence Equipment & Technology Intelligence Centre receive complimentary access to Jane's Online Intelligence Briefings.

These briefings provide an exclusive opportunity to delve more deeply into the most topical issues. Expert analysts delivering 45-60 minutes of insight, finishing with a Q&A forum during which they respond to specific questions posed by attendees.

Consultancy and Advisory Services

Jane's provides specialist consultancy and advisory services that help decision makers overcome specific, time-bound challenges in such areas as capability analysis, threat assessment, scenario analysis, futures and wargaming, procurement and sustainment, and OSINT optimisation.
