Intelligence Unit

Open source assessments of the global threat environment tailored to you and your organisation’s needs

janes.com/JIU
An assured, unclassified, alternate perspective from Jane’s independent experts

The Jane’s Intelligence Unit provides customers with cutting-edge open source intelligence on current, emerging and future threats and assessments on the capabilities required to mitigate those threats.

We use a multi-faceted approach to deliver verified and validated open source information and intelligence at the highest levels of assurance.

Jane’s Intelligence Unit provides:
- Objective, expert threat assessments tailored to your specific needs
- Horizon scanning for future security and geopolitical challenges and their potential impact
- Analysis and insight into military and security capability innovation
- OSINT optimisation through training, advisory, specialist capability and intelligence support
Leveraging Jane’s expertise enables you to understand and plan for tomorrow’s threats without diverting valuable resources from the threats you face today.

Why choose Jane’s Intelligence Unit?

Using verified and validated open source information and intelligence, Jane’s Intelligence Unit provides an assured, unclassified, independent perspective that increases your awareness of strategic and operational challenges.

- Actionable intelligence tailored to your specific requirements
- Information derived from the widest possible array of open sources, including social media
- A global expert network which provides specialist capabilities, including local languages
- Fully unclassified reports and briefings that are easy to share
- Discreet, low-attribution research
- Original and creative intelligence assessments generated using a range of alternative analysis techniques including scenario analysis; wargaming; red teaming; Delphi method
Supporting Threat Assessment

Jane's Intelligence Unit delivers objective, expert assessments of threats tailored to the needs of each specific customer.

Insight on conventional and asymmetric threats, including:

- **Terrorism**
  Financing, ideology, strategy, tactics and operations

- **Extremism**
  Messaging and counter-messaging

- **Organised crime**
  Transnational crimes, trafficking and smuggling

- **State-level threats**
  Regional competitions, misinformation and disinformation campaigns

Examples of Jane's Intelligence Unit customers' requirements
- Provide me with an assessment of the illicit small arms market in SE Asia that I can share easily with my intelligence customers
- What am I missing in my assessment of violent extremist and militia groups in Libya?
Horizon Scanning

Jane’s Intelligence Unit provides estimative intelligence on future security and geopolitical challenges and their potential impact.

Assessments of future threats and challenges, covering:

- **Conflict analysis**
  Monitoring active and ‘frozen’ conflicts, analysing future conflict

- **Technology challenges**
  Security implications of advances in technology

- **Geopolitical instability**
  Assessments of fragile states

Deployment of structured estimative techniques including:
- Red teaming
- Scenario analysis
- War games and table-top exercises

Examples of Jane’s Intelligence Unit customers’ requirements
- What will be the impact of technological advances on security and conflict?
- What scenarios might emerge in the Syrian conflict over the next 12 months?
Capability Innovation

Jane’s Intelligence Unit delivers analysis of the latest developments in military capabilities, including the evolution of doctrine and concepts of operation.

Tracking changes in military capability, including:

- Capability assessment
  Understanding military forces and their Orders of Battles (ORBATS)

- Changing warfare
  Analysing the evolution of military and security requirements and the development of new doctrines and Concepts of Operation (CONOPs)

- Proliferation
  Assessing spreading nuclear capability and other technological advances, such as the use of drones

Examples of Jane’s Intelligence Unit customers’ requirements
- What tradecraft are DAESH supporters using to continue operating successfully on social media?
- How will military doctrine change to deal with hybrid warfare?
Optimising OSINT

Jane’s Intelligence Unit helps customers improve the skills and expertise of their OSINT teams and advises on the creation of new OSINT units.

Assisting customers in improving their OSINT capability through:

- **Training**
  Improving the skills and expertise of OSINT analysts, teams and managers

- **Client advisory**
  Working with organisations to refine existing OSINT practices

- **Capability development**
  Establishing and guiding new OSINT units for our clients

- **Intelligence support**
  Providing clients with outsourced specialist capabilities and analytical capacity

Examples of Jane’s Intelligence Unit customers’ requirements

- Can Jane’s develop tailored subject ‘primers’ to help our analysts quickly get up to speed on relevant security and defence topics?
- How can we ensure that our new OSINT hub has the capabilities to produce high-quality, timely and relevant insight on security threats?
Leveraging Jane’s expertise enables you to understand and plan for tomorrow’s threats without diverting valuable resources from the threats you face today.
