

Petrodata FPSbase

Stay abreast of the latest developments in the ever-changing floating production sector

FPSbase is an online database that contains exclusive news and data on all types of floating production systems, including FPSOs, FSOs, semis, TLPs, spars, FSRUs and FLNG units. It tracks platforms in operation, available for redeployment, under construction, as well as global FPS projects in the planning and tendering stages.

Accurate and impartial data

IHS Markit strives to provide the most accurate and complete information to help clients make the right decisions and identify new business opportunities and threats. Our global team of analysts maintains constant direct dialogue with asset owners, operators, contractors, fabrication yards and other industry players to gather data and news on the FPS fleet worldwide.

Timely delivery

Unlike other products on the market, FPSbase is a live database updated around the clock. The new information becomes available to clients immediately and can be pulled any time quickly and easily.

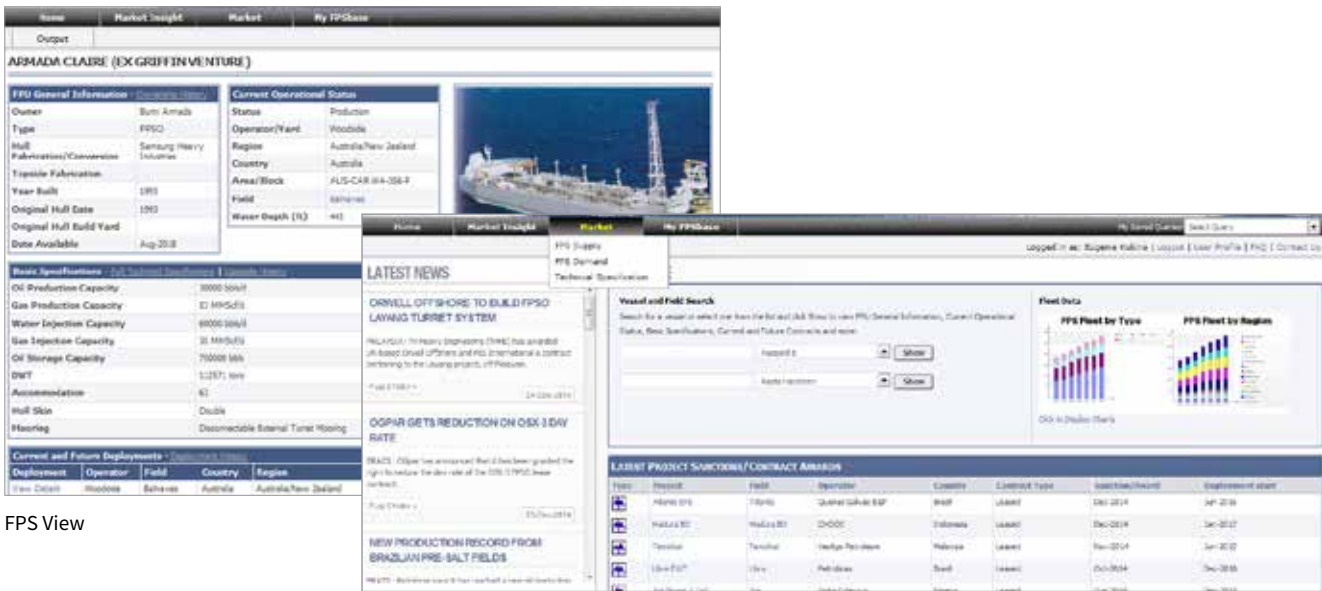

In-depth analysis

Built-in analytical tools and the ability to customize and download all searches allow the user to easily assess FPS activity globally or by region, evaluate market trends, analyze existing portfolio and performance of clients and competitors, and much more.

PRODUCT FEATURES:

FPSbase gives access to constantly updated information on floating production systems, including:

- New FPS orders & deliveries
- Day rates & construction costs
- Lease contract details
- Technical specifications
- Ownership
- Availability
- FPS demand
- Upcoming tenders & contract awards
- Daily FPS market news
- FPSbase Quarterly Report
