Brenntag offers an extensive portfolio with a range of unique additives that include high-performance surfactants, wetting agents, defoamers, dispersants, silanes, thixotropes, celluloses, and fumed silica that improve and enhance properties in waterborne and solventborne adhesives and sealants.

Please contact your local Brenntag Account Manager for more information.

Brenntag represents specialty and industrial product lines for the adhesive and sealants formulator from world class global and local manufacturers, including VAEs, Acrylics, Vinyls, PVOHs, Hydrocarbon Resins, Rosin Esters, Epoxies and hardeners, Phenoxies, Phenolics, PIbs, Fumed Silicas, Silanes, Silicones, Crosslinkers, Fillers (CaCO3, ATH, Barytes, Silica), Polyols, Isocyanates, Polyurethanes, Moisture Scavengers, Adhesion Promoters, Antioxidants, and Polyspartic Amines.

Brenntag’s local inventory coupled with professional technical assistance, including application laboratory support, provides the highest value to our customers.

adhesives and GENIOSIL®WP for waterproof-adhesives, GENIOSIL®STP-E for sealants and hybrids, GENIOSIL® XB for strong bonding. For compounders: Polymers- Silane modified for semiconductor and solar applications. pharmaceutical actives and hyperpure silicon for diverse industrial sectors to bio-engineered from silicones, binders, and polymer additives most research-intensive chemical companies.

WACKER is one of the world's leading and most research-intensive chemical companies with total sales of €4.91 billion (2011). Products range from silicones, binders, and polymer additives for diverse industrial sectors to bio-engineered pharmaceutical actives and hyperpure silicon for semiconductor and solar applications. For compounders: Polymers- Silane modified hybrids, GENIOSIL® XB for strong bonding adhesives, GENIOSIL®STP-E for sealants and adhesives and GENIOSIL®WP for waterproofing and membranes. Silicone RTV-1 base OH polymers & fluids for sealants and coatings. Vinyl-acetate-ethylene: VINNAPAS®VAE copolymer dispersions grade for vinyl and acrylic based sealants and caulks, VINNAPAS® dispersions for adhesives. For additives: silanes and crosslinkers GENIOSIL®GP grades and XL alpha grades for adhesion promoters, water scavengers, surface modification, crosslinking, end-capping, radical grafting and co-polymerization. Fumed silica: HDK® hydrophilic & hydrophobic grades for rheology control and reinforcement.

For Repackers: GENIOSIL® is a novel range of silane modified hybrid compounds from sealants to adhesives including high tack adhesive variants. ELASTOSIL®: A broad range of acid and neutral cure silicone sealant including special temperature and aquarium grades.

EASTMAN CHEMICAL COMPANY
P.O. Box 431
Kingsport, TN 37662 USA
Tel: 423-229-2000
Fax: 423-229-1193
E-mail: adhesives@eastman.com

Eastman is a global leader in raw materials for adhesives, sealants and polymer modification. We offer the broadest product portfolio coupled with an extensive sales and technology support network and manufacturing sites around the world.

Eastman’s tackifying products include hydrocarbon, and resin dispersions. Polymer products include amorphous polyolefins, functionalized polyolefins, water dispersible polymers, acrylic emulsion polymers, solvents and plasticizers. Eastman provides a wealth of formulating expertise and innovative options for your formulating needs.

COVESTRO LLC

Brenntag is a primary, full-range distributor of aqueous dispersions and emulsions, representing the leading world-class manufacturers of polyurethane dispersions, waterborne acrylics, styrene-acrylics, vinyl-acrylics, VAEs, EVCLs, waterborne phenoxy dispersions, epoxy dispersions and hardeners, phenolic dispersions, polyvinyl butyral dispersions, water-reducible alkyds, Oil-modified PUDs, WB SMA resins, PVOHs, and Polysiloxane and Silicone emulsions.

Brenntag also carries a full complement of waterborne associative thickeners, cellulose thickeners, flattening agents, defoamers, dispersants, wetting agents, flocculants, pigment stabilizers, cosolvents, and metallic stearates, as well as waterborne crosslinkers, including WB blocked isocyanates, Phenolics, polyaziridines, and PAEs. Much of the work done in Brenntag’s own ACES Applications Lab confirms the great value Brenntag brings to our customers.

Brenntag is a primary, full-range distributor of coupling agents – silane-based, organotitanate-based, and organozinconate-based. A coupling agent resembles a molecular bridge between the interface of the inorganic filler and organic polymer matrix.

1. Brenntag coupling agents provide:
   1. Enhance adhesion
   2. Greater load transfer from the polymer matrix to the reinforcing fillers
   3. Prevent aggregation
   4. Improve bond strength and moisture resistance (corrosion)
   5. Reduce viscosity

Please contact us with your specific coupling agent needs today and let us help you in Connecting Chemistry.

GELEST, INC.
11 E. Steel Rd.

Gelest Inc. develops and manufactures SILANE, SILICONE and METAL-ORGANIC molecular materials and provides technical solution for surface modification applications that enable adhesive and sealant technologies for enhanced performance on plastics, ceramic, metal, glass, concrete and inorganic mineral surfaces.

The Gelest product line includes functional silane, silicone and metal-organic materials for:
- Adhesion promotion and crosslinking
- Improved chemical resistance and corrosion protection
- Controlling hydrophobicity, hydrophilicity and oleophobicity
- Rheological aids (improved processing, dispersion, flow)

Dynasol is a global leader producer of styrene-butadiene copolymers including SEBS, SBS and SSBR, commercialized under the trade names Solprene® and Calprene®. Learn more about our vibrant product portfolio for Adhesive and Sealant applications at www.dynasollastomers.com

Manufacturer of bulk and stick form hot melt adhesives. Complete line of hand guns/applicators available. Hot melt tolling services.
Any sealant can perform well in the right application but choosing the optimum raw materials for a specific sealant is a formulator’s toughest challenge. Let Brenntag help you in Connecting Chemistry to provide the best solution to your sealant formulating task.

Brenntag provides the fullest and broadest line of raw materials for the sealant industry, including Fumed Silicas, Silanes, Silicones, VAEs, Acrylics, Vinyils, Crosslinkers, Fillers (CaCO3, ATH, Barytes, Silica), Polyls, Isocyanates, Polyurethanes, Moisture Scavengers, Adhesion Promoters, Antioxidants, and Polyaspartic Amines.

Evonik Degussa Corporation offers AEROSIL® fumed silica, AERODISP® (aqueous dispersions of fumed silica), Dynasylan® and Hydrosil® silanes, Sipernat® performance silicas and Printex® carbon blacks for the adhesives and sealants industries. AEROSIL® fumed silicas can be used to increase viscosity and reinforcement, Dynasylan® and Hydrosil® silanes are excellent adhesion promoters, Sipernat® offers performance silicas with better application properties and Printex® provides carbon blacks with improved rheology and UV-stability.
