This annual report provides cover lens shipments for consumer applications and a five-year forecast. The report includes an analysis and data in pivot table format of different applications, cover materials, shape, location, and sizes.

The report also reviews topics related to the cover lens industry, 3D cover lens finishing, surface coating development, flexible cover lens development, cover lens suppliers and finishers and more, which enables subscribers to see the dynamics of the cover glass industry.

Additionally, this report includes 30 cost modelings and analysis that enable subscribers to see the key elements that have an impact on the total cost of cover lens common to the industry.

Key Issues Addressed

- Cover lens end market forecast for application in shipment, revenue and area
- Cover lens material market forecast for application in shipment, revenue and area
- Comprehensive pivot parameters for data break-down and handy use
- Detailed cover lens manufacturing process, coating, technologies introduction
- Cover lens cost modeling and what factors have a significant impact on total cost

Applicable To

- Brand manufacturers, OEMs, ODMs for mobile phones
- Procurement managers for display components
- Display/touch module suppliers
- Product planning managers
- Procurement managers for display components
- Cover lens finisher suppliers
- Product marketing intelligence managers
- Procurement managers for components
- Cover lens material suppliers
- Product marketing intelligence managers
- Investment community
- Fund managers, investors, analysts with an interest in the cover lens industry
Table of Contents

Key findings

1.0 Executive summary

2.0 Cover lens demand and market forecast
    2.1 Cover lens end-market forecast overview
    2.2 Cover lens end-market forecast by application
    2.3 Cover lens material market forecast overview
    2.4 Cover lens material market forecast by material
    2.5 Cover lens material market forecast by shape and location

3.0 Cover lens cost model
    3.1 Remarks for cost model
    3.2 Cost models for major applications
    3.3 Cover glass cost trend analysis
    3.4 Forming and cover glass cost
    3.5 Surface coating and cover glass cost

4.0 3D cover lens finishing trends
    4.1 General finishing process
    4.2 3D cover glass process and technique
    4.3 3D cover glass form factor

5.0 Profile/notch cutting study on cg and TFT glass
    5.1 Full screen display drives profile/notch cutting
    5.2 Profile/notch cutting technology
    5.3 Market demand and supply chain

6.0 Cover glass cosmetics trends
    6.1 Purpose of cover glass cosmetics
    6.2 Emerging printing method for 3D cover glass cosmetics
    6.3 Conclusion and comparison

7.0 Surface coating development trends
    7.1 AR/AG coating treatments
    7.2 AF/AS coating treatments
    7.3 Hard coating treatments
    7.4 Other function coating

8.0 Flexible cover lens development trends
    8.1 Flexible form factor and challenge
    8.2 Ultra-thin cover glass solution
    8.3 Plastic cover lens + Hard coating solution

9.0 Cover glass suppliers and finishers
    9.1 Major cover glass suppliers and market share
    9.2 Major cover glass finishers

10.0 Methodology and definitions

About IHS

IHS (NYSE: IHS) is the leading source of information, insight and analytics in critical areas that shape today's business landscape. Businesses and governments in more than 165 countries around the globe rely on the comprehensive content, expert independent analysis and flexible delivery methods of IHS to make high-impact decisions and develop strategies with speed and confidence.
