Jane’s Terrorism and Insurgency Centre

Local knowledge of a global threat environment

janes.com/jtic
A shifting global environment

An unsettled world of shifting and evolving social, political, and economic environments is giving rise to new actual and potential threats that security organisations must detect, understand, and counter. As the alliances, aims, and operational methods of non-state actors constantly change in response to events, analysts need to understand the direction and pace of change in order to make critical decisions and create meaningful plans. Perhaps most importantly, analysts need to be able to trust the open-source intelligence these plans and decisions are based on.
For more than 100 years, security organisations across the globe have trusted Jane’s to deliver objective, meaningful, and actionable intelligence quickly and effectively through unmatched data and expertise.

Drawing on the global expertise of the IHS Markit Country Risk Analysis and Forecasting Team and Jane’s analysts, Jane’s Terrorism and Insurgency Centre (JTIC) provides open source intelligence using data that is collected from multiple sources and double-source verified. This enables analysts to work only with those data sets that are significant and reliable in order to support, validate, and declassify proprietary and classified sources.

Our analysts, who are acutely aware of the difficulties inherent in the use of open source information, apply a rigorous methodology to the gathering and processing of open source data. This enables them to mitigate potential pitfalls, and provide assurance to our customers, that they can trust the conclusions they draw from Jane’s data and insight.

Objective, impartial, and reliable insight from experts you can trust
Understand the threat environment

Jane’s Terrorism and Insurgency Centre saves you time in the collection, validation, verification, and interpretation of global terrorist and insurgent activity.

**Jane’s provides a comprehensive big-picture view, enabling analysts to:**

- Monitor the activity of non-state actors with daily news and analysis of events
- Filter and discriminate information from noise with an event significance qualifier for each record
- Reveal otherwise obscure trends, variances, and anomalies with optimised data visualisation tools
- Gain a deep understanding of the capabilities, doctrines, and leadership of non-state armed groups
- Combine JTIC data with your own data, as well as with other third-party sources. JTIC data is available in multiple formats and can be easily integrated into internal systems
- Share findings with allies and partners; there is no risk in sharing data from JTIC as we provide open source intelligence with zero classification
Structured, consistent, comprehensive

Jane’s Terrorism and Insurgency Centre is a structured, consistent, and comprehensive database of open source events related to non-state armed groups, with multiple fields of granular metadata that is updated on a daily basis. It provides insight and in-depth analysis on global topics, going beyond events to explain the context and driving forces behind global unrest, insurgency, and terrorist activities.

**Jane’s Terrorism and Insurgency Centre contains:**

- An exhaustive database of more than 370,000 terrorist and insurgent events dating back to 2009 is updated daily. Events are covered systematically using a consistent and structured methodology
- Verified and validated data on more than 350 non-state armed groups
- Qualitative analysis on events, non-state armed groups, and national terrorist and insurgent risk factors
Bringing together key content to support your workflow

Jane’s Terrorism and Insurgency Centre brings together content from Jane’s defence and country risk experts to provide a solution that supports your workflow and helps you deliver a more robust intelligence product.

Group Profiles

Incorporating detailed data and analysis of more than 290 groups, Jane’s Terrorism and Insurgency Centre provides you with the insight you need to develop a deep understanding of the capabilities, doctrine, and leadership of non-state armed groups operating across the globe.

**Regularly updated, the group profiles provide data and analysis including:**

- Executive summary
- Aims and objectives
- Areas of operation
- Alliances and rivalries
- Operational methods
- Leadership
- Organisation and recruitment
- Funding
- Propaganda
- Political activities
- Campaign narrative
### Events Database

The events database delivers non-state armed group events data that can be viewed as a list, chart or geospatial layer that can be ingested into GIS systems for analysis and integration with related layers.

#### Manipulate verified and validated metadata

News and analysis

Global news, analysis, and daily insight into terrorism and counter-terrorism events, trends, and developments are drawn from renowned Jane's national security news resources including Jane's Intelligence Weekly, Country Risk Daily Report, Terrorism & Insurgency Monitor, and Jane's Intelligence Review.

Global attack index and country briefings

The monthly global attack index provides a holistic examination of the worldwide trends in violence by non-state armed groups over the previous month to provide a global perspective.

Following this overview, the reports then focus in on a regional level to provide more nuanced analysis of key trends, events, and developments within regions and specific countries.

For each region, a country assessed as experiencing significant or notable levels of non-state armed activity is then selected, assessed, and evaluated as a country briefing by our experts. Separate country briefings are produced for Iraq and Syria every month.
Data analytics

By incorporating Jane’s Terrorism and Insurgency Centre data analytics into your subscription, you will have access to filtering and visualisation capabilities that are intuitive and very simple to use. These interactive Tableau dashboards bring clarity to large and complex data sets.

Non-State Armed Group Attack Tracker: Iraq and Syria

Iraq and Syria are currently facing significant insurgencies by non-state armed groups, this dashboard provides an overview of attack patterns across the two countries.

Non-State Armed Group Tactical and Targeting Trend

By utilising 12 months of non-state armed group (NSAG) attack data this dashboard enables you to explore the trends in the tactics and targets of the different groups and how they have changed over time.

Global Non-State Armed Group Attacks Explorers

Activities by non-state armed groups present a wide range of security questions and concerns throughout the world. This dashboard uses attack data to present an overview of attack trends over the last 12 months.

Group Profiles

Analyse activity by group over the current year and five prior years. Filter the data by country, attack, casualties to identify trends in attacks, targets, tactics and weapons used.
Focused on maximising the return on your investment

Jane’s views every subscription as an investment for the subscriber organisation, and provides support to help ensure that the return on that investment is maximised. As a trusted independent partner everything we do is focused on meeting and exceeding subscriber expectations, from product and service development, to ensuring that you can access content in the format that suits you best; online or offline.

Integrate data and information quickly and easily

Jane’s Terrorism and Insurgency Centre content is available in multiple formats to align with user workflows. The online database provides users with instant access to the very latest content, with new content and updates added regularly. Offline access delivers the same content via disc or ftp site in a way that enables you to integrate data and information quickly and easily into other systems, intranets, models, and simulations.
Incremental support

OSINT training

Jane's offers a range of OSINT training courses that equip attendees with the latest best practices in order to help national security organisations maximise their exploitation of open-source intelligence. To learn more about these courses visit janes.com/osint

Online Intelligence Briefings

Subscribers to Jane's Terrorism and Insurgency Centre receive complimentary access to Jane's Online Intelligence Briefings. Delivering additional analysis, these 45 - 60 minute briefings provide an exclusive opportunity to delve more deeply into the most topical issues.

Consultancy and advisory services

Jane's provides specialist consultancy and advisory services that help decision makers overcome specific, time-bound challenges in areas including capability analysis, threat assessment, scenario analysis, futures and wargaming, procurement and sustainment, and OSINT optimisation. To find out more about how Jane's can provide answers to your most complex, critical, and urgent questions, contact us via janes@ihsmarkit.com
About IHS Markit

IHS Markit (Nasdaq: INFO) is a world leader in critical information, analytics and solutions for the major industries and markets that drive economies worldwide. The company delivers next-generation information, analytics and solutions to customers in business, finance and government, improving their operational efficiency and providing deep insights that lead to well-informed, confident decisions. IHS Markit has more than 50,000 key business and government customers, including 85 percent of the Fortune Global 500 and the world’s leading financial institutions. Headquartered in London, IHS Markit is committed to sustainable, profitable growth.
