

IHS ENERGY

IHS Petrodata FieldsBase

Your single concise source of information on the offshore field development market.

PRODUCT BENEFITS

- Get instant access to comprehensive information on the offshore field development market
- Assess historical and future activity levels and visible demand for platforms, pipelines and subsea trees
- Use built-in analytical tools to quickly organize expansive data sets
- Read live news feed
- Discuss the market with IHS field development analysts

FieldsBase is a unique online tool that provides exclusive data and market intelligence about:

- Global offshore field development projects
- Offshore construction and decommissioning activity
- Discoveries, new developments and producing fields
- Fixed and floating production platforms
- Pipelines and umbilicals
- Subsea trees
- Engineering, construction and installation tenders and contract awards

FieldsBase contains details on thousands of offshore field development projects around the world. It provides up-to-date information on schedules, development schemes, required infrastructure, as well as awarded contracts, tenders and construction vessels.

Accurate and impartial data

Our global team of experienced field development analysts maintains constant direct dialogue with operators, contractors, fabrication yards, ship owners and other industry players to gather and verify data on offshore field development projects worldwide.

Daily data updates

Unlike other products on the market, **FieldsBase** is a live database updated throughout each business day, with new information becoming available to clients immediately.

Analyze the market

Built-in analytical tools and the ability to customize and download all searches allow the user to easily assess field development activity by region, evaluate market trends and visible demand, analyze companies' performances and market share, and much more.
