

# The Construction Information Service

Supporting every stage in the construction lifecycle

Information & Expertise  
In Partnership

## CIS - A vital tool for the successful delivery of every construction related project

The Construction Information Service is an expert knowledge tool that delivers key technical information critical to the construction market.

Developed by IHS and NBS, The Construction Information Service provides instant full-text access to current regulations, standards, technical advice and a vast array of related news and briefings, available in a choice of packaged information to suit individual needs.

Fully searchable, intelligently classified and constantly updated, it's an indispensable source of key information for the construction professional.

### Benefits at a glance

- 01** Supports every stage in the construction lifecycle – from concept and feasibility, through design and construction, to operation and ongoing use
- 02** Information for professionals working in architecture, planning and development, surveying, engineering, landscape, building control, building specification, construction management, building and civil engineering
- 03** Full-text copies of British Standards and other documents referenced in Building Regulations to ensure compliance
- 04** Dedicated professional editorial team providing you with access to over 26,000 documents from over 500 publishers
- 05** Updated weekly, providing authoritative information fast
- 06** Fast access to critical information delivered by a powerful and intuitive search engine
- 07** Tools to individualise the product - set preferences, save key searches and store documents
- 08** Integrated links between NBS Specification products and The Construction Information Service, ensuring that nothing is missed from your specifications
- 09** Direct access to the online Architects Journal
- 10** Comprehensive coverage of healthcare building and construction information – an invaluable source for healthcare estates management
- 11** Subject guides, briefings, news, reviews, technical information and guidance publications for English, Welsh, Scottish and Irish regulations
- 12** Integrated access to Specify-it, a collection of construction catalogues, equipment information and CAD drawings

### Our CIS Partners

## The Construction Information Service

Supplement	Who could use it?	Brief Description	Example Documents/ Publishers
Core	This part of the service has been developed to cover the wide-ranging needs of most construction industry professionals	Where possible The Construction Information Service Core includes key documents cited in the UK Building Regulations Approved Documents, and key technical standards and booklets	Building Regulations, Eurocodes, National Annexes and select NCCI material, BRE, HTM and HBN's British Standards. Specimen contract documents
