

IHS Markit™

ENERGY

# EDIN

A web-based solution that provides your fastest, easiest access to our most current E&P, Basin and Midstream content.

# What is EDIN?

EDIN is IHS Markit interface into our E&P, Basin and global Midstream datasets. It is a web browser solution that provides customers with the most complete industry datasets available. EDIN supports core industry workflows such as country and basin screening, portfolio optimization, prospect evaluation, peer group analysis and country entry strategy.

## EDIN can help with the following:

### Basin Screening:

**Evaluation and ranking of sedimentary basins to assess their hydrocarbon potential, production status and reserves**

- Identification of Play Fairways
- Identification of Source, Reservoir & Seal
- Annual Production
- Remaining Reserves

### Portfolio Optimization:

**Identification and assessment of available assets and their commercial value**

- **Farm-in Opportunities**
  - Asset Ownership
  - Exploration History
  - Petroleum System
  - Production/Reserves overview
- **Asset Divestment:**
  - Risk Reduction
  - Partnership
  - Portfolio Analysis

### License Round Activity:

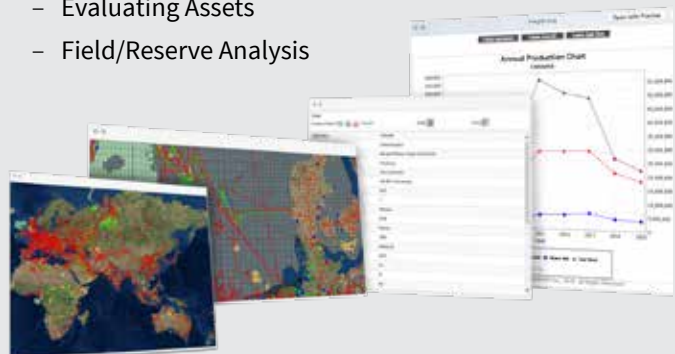

**Identification of current rounds and access to information pertaining to available blocks**

- Identification of Rounds
- Location of Available Blocks

### Maximizing New Ventures Opportunities:

**Opportunity analysis and prospect evaluation**

- Clients do not have the time or resources to attend data rooms
- Evaluating Assets
- Field/Reserve Analysis

# Features

## Data/Map Search

Map

Report

Export

Graph

### Search

EDIN provides users with a powerful search facility for reviewing E&P, Basins, Midstream and Unconventional data.

### Map

The NEW platform provides enhanced performance for displaying content along with a dynamic interface. There are a selection of ESRI Base Maps that can be used to create and print maps. We have also introduced the option to export spatial content as a File GeoDatabase. Customer feedback is important to us and we have used this to develop the map interface for the 7.0 release.

### Report

Readily available within the product are a series of standard/commonly used reports for each subject area. In addition, customers also have the ability to create their own customized reports within each subject area. These are available in a variety of file formats.

### Export

A variety of options and formats are available for downloading content via Reports, Data Extracts or Spatial Exports. In the latest release (7.0), we have introduced the option to export as a File GeoDatabase.

### Graph

The ability to display data in a graphical format is a powerful tool and EDIN provides users with a series of graphs for E&P, Basins, Unconventional and Midstream content. These are accessible via the Data and Map search interfaces.

## EDIN Benefits

- Content is regularly reviewed for consistency, currency, completeness and correctness
- Data is sourced, reviewed and input by regional teams with years of industry experience and expertise
- Access to a fully QC'd dataset, within a single interface
- Industry Insights via direct access to our energy experts
- Inter-relational nature of the datasets

## EDIN Implementation

- No installation costs
- No new software required
- No ongoing IT support costs
- No new IT infrastructure required
- Minimal training required
- Easy to expand usage when required

## Related Products

### **Global Exploration Production Service (GEPS)**

provide real-time reports on current, historical and planned upstream activity across the globe. Produced by 23 technical teams, who collaborate with over 4,000 subject matter experts in more than 200 countries, to provide a comprehensive, real-time view of worldwide E&P activity.

### **Petroleum Economics and Policy Solution (PEPS)**

is a complete and integrated package of information and tools that enable in-depth understanding and holistic cross-country comparison of E&P prospectivity, upstream investment terms, and petroleum sector risk worldwide.

**IHS Vantage®** is an innovative, online application that provides detailed valuation analysis for upstream oil and gas assets globally. Leveraging world-class software, proprietary IHS Markit exploration and production (E&P) data, and a transparent methodology, IHS Vantage supports E&P workflows, making it possible to value and analyze more than 14,000 assets at various stages of development.
