Enterprise Data Management (EDM): Managed services

Hosting, managing and standardizing data management needs.

Enterprise Data Management (EDM) managed services enable customers to simplify data management delivery.

Firms can optimize infrastructure, maximize compliance and minimize costs while benefitting from a strategic, scalable approach to improving operations.

Data management needs differ from business to business. Business and regulatory requirements change and evolve. Mapping out a firm’s data architecture can be complex and expensive.

Users of EDM managed services benefit from IHS Markit’s data management expertise. Variable costs can be managed carefully while firms retain control of their data.

Time to market
Access the latest capabilities and technologies while lowering risks, costs and administrative overhead

Cost management
Reduce fixed costs and expenditure associated with hardware, applications and their management

Rapid deployment
Standardized templates combined with a flexible architecture provide the best of both worlds

Single tenant model
Data and rules are stored and maintained solely for the benefit of a single client to ensure data segregation

Compliance
Manage regulatory requirements and benefit from strong security, backup and disaster recovery

Scalability
EDM implementation specialists help evolve applications as new business rules, data and business providers surface
