

# Engineering productivity at risk

Up to  
**30%**

of all expenditure in R&D is wasted on **redeveloping existing inventions.**

SOURCE: European Commission (DG Research) and the European Patent Office

Over  
**70%**

of companies admit to investing in **research that led to a previously patented solution.**

SOURCE: VTT Tiedotteita

**40%**

of engineers' time is spent searching for information.

SOURCE: Deloitte

**13** **unique data sources**

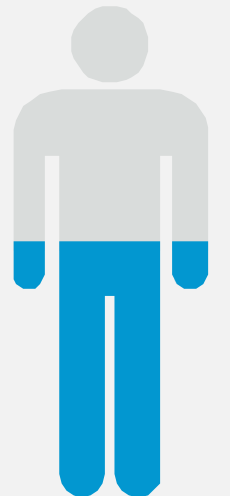

are used to find answers to each engineering challenge

SOURCE: Aberdeen

Workers can't find the information they need almost half the time.

**46%**

SOURCE: IDC

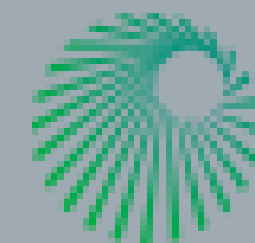

**54%**

of decisions are made with incomplete, inconsistent, inadequate information

SOURCE: Infocentric Research

IHS Engineering Intelligence solutions accelerate productivity by quickly connecting engineers to the answers they seek. Give your engineers back 1/3 of their research time.
