Harmony Enterprise Turnkey Deployment Preparation Checklist – Considerations and Requirements		
Topic	**Steps**	**Completed?**
SQL Server	Are you planning to use SQL Server or SQL Server Express?	
	Is SQL Server or SQL Server Express already installed? What is your SQL environment? Does one exist? *If you do not have an SQL environment, we will help with SQL Express installation	
	Required: supported version of SQL Server or SQL Server Express 2012, 2014 (recommended) and 2016 are supported	
	Required: Location and credentials for SQL Server	
	Required: Administrative rights to SQL Server	
	Required: SQL Server Management Studio (version matches SQL Server application)	
	Required: SQL Server Native Client 11.0	
Entitlements	Required: Location and credentials for license server	
	Required: Administrative rights to install license manager application	
	Required: Entitlement Identification (EID) on hand	
Workstation	What operating system are you using? Supported versions include Window 7, Windows 8.1 and Windows 10	
	Required: Location and credentials for computer being deployed to	
	Required: Administrative rights to install applications	
User Rights	Do you want users to have data import rights?	
	Do you want users to have well delete rights?	
	Do you want to a Windows Active Directory group to grant access, or grant access on a user-by-user basis?	
	Do you have a Windows Active Directory group you can use to grant user permissions to the Harmony Enterprise project database?
