

IHS Energy Overview

Our solutions help customers deepen their insights and narrow uncertainties for decisions such as:

- formulating corporate strategy
- making capital investments
- capital and operating cost analysis and optimization
- purchase and sale of assets
- entry and exit along the value chain
- understanding impact of regulations on strategy and operations
- marketing or hedging commodities
- oil and gas exploration strategy and investments
- optimizing oil and gas reservoir development
- taking a position on government policy or regulation

IHS Energy helps customers improve strategy and performance across the energy value chain

As the industry's authoritative provider of information, analytics, and insight, IHS Energy is where organizations look first for market trends and to see the big picture. We help companies understand the interconnected, dynamic forces that shape the world's energy markets through our expertise in Economics and Country Risk, Chemicals, and energy dependent industries.

Our experts and analytical tools enable clients to continuously improve their strategy and operations across the entire energy value chain. We have a global network of 1200+ experts and consultants located in all key energy markets around the world ready to assist customers in oil and gas, power and coal companies, as well as energy ministries and agencies, renewable technology firms, and financial and energy services companies.

The IHS Energy team includes researchers, geoscientists, engineers, data analysts and software developers who are continuously enhancing our forecasts and outlooks, analytical platforms and datasets, including the world's largest and most complete exploration and production database.

IHS Energy Scope of Capabilities

Upstream Oil & Gas	Oil markets, Midstream & Downstream	Power, Gas, Coal and Renewables
Country E&P Terms and Above-ground Risk	Crude Oil Markets	Global Gas
Plays and Basins	Midstream Oil and NGL	Coal
Costs and Technology	Refining and Marketing	Power and Renewables
Companies and Transactions	Company Strategies and Performance	Integrated Regional Gas, Power, and Coal Markets
Energy-Wide Perspectives		

IHS Energy is part of IHS, the leading source of information, insight and analytics in critical areas that shape today's business landscape. The depth and breadth of IHS gives our clients unmatched access to the world's foremost experts not only in the energy sector but also in key related industries including economics and country risk, petrochemicals, automotive, aerospace and defense, maritime and technology. The resulting energy forecasts and outlooks are unparalleled in their full integration of industry drivers, the macro-economic environment and geopolitical risk dimensions.

As a result, IHS Energy clients are able to make critical decisions, from portfolio investments to asset or commodity trades, and from infrastructure planning to cost optimization, based on a comprehensive understanding of relevant dynamics and risks.

IHS Vantage

IHS Vantage is an interactive online platform that provides forecasts for costs, production and valuation of more than 13,000 global upstream oil and gas assets.

IHS Vantage leverages the expertise of dedicated technical experts including geologists, engineers, and economists combined with world class tools, propriety IHS exploration and production (E&P) data, and the latest upstream intelligence reports. Vantage enables users to quickly and consistently value upstream assets, screen for new opportunities, analyze cost and production outlooks, benchmark against competition, and make critical commercial decisions.

IHS Energy – Integrating Research, Analytics and Software

IHS Energy data, software, advisory services and consulting solutions provide roadmaps and mileposts into the energy future across all regions and fuel types. The resulting insights enable executives, planners, commercial and financial analysts, investors, asset teams and government officials to plan and execute strategy with greater speed and confidence.

We help these decision makers build an integrated and timely understanding of the above-ground business environment and risks for all energy sectors – oil and gas, coal, power and renewables – as well as the below-ground oil and gas supply future, from prospect generation to operations. Our research teams ensure these integrated views incorporate the latest, most comprehensive data and analysis around energy market activity, economics, geopolitics, technological change, and environment and regulatory forces.

IHS Capability Overview

Upstream Oil and Gas:

IHS Upstream Oil and Gas Solutions provides the information, analytics and insight the oil and gas industry needs for exploration and production of crude oil and natural gas fields. With the aim to help customers find the (next) best drilling opportunity (through conventional or unconventional techniques), our upstream offering focuses on the analysis of above ground factors that affect the financial returns of capital investments; commercial assessments of play and basin opportunities; analysis, indexes and outlook for upstream project costs, service and equipment markets, and technology innovation; and oil and gas company, strategy, performance and valuation plus energy M&A and divestiture insight.

Oil Markets, Midstream and Downstream:

Understand regional and global market, company, and cost insights across the oil markets value chain. Our world class experts and industry leading methods and indices provide detailed analysis ranging from crude oil, midstream oil and NGLs to refining, marketing, and company strategies and performance.

Power, Gas, Coal and Renewables:

Provides data, analysis and insight on Global Gas, Global Coal, Power and Renewables and Integrated Regional Gas, Power and Renewables markets. Includes global, country and region level market outlooks and fundamentals, as well as industry and project monitoring, and the technology, environmental and regulatory environment.

Energy-Wide Perspectives:

Long-term planning scenarios; climate change policy developments; and high-level briefs monitor the impacts on oil and gas markets. Includes specific views of the energy value chain for Financials and Service companies.
