

IHS Markit is pleased to announce the release of Version 1.3 of IHS Engineering Workbench<sup>™</sup>, delivering additional and enhanced Standards management capabilities, along with usability and user personalization enhancements based on user feedback.

#### Learn More.

<u>Click here</u> to watch a recorded demo of the new capabilities in IHS Engineering Workbench 1.3 (may take a minute to load, depending on your browser and connection).

Read this <u>briefing paper</u> (PDF) detailing how Engineering Workbench makes finding, using and managing standards easy and convenient.

#### **Release Description**

IHS Engineering Workbench Version 1.3 is the latest in a series of releases enabling best-in-class Standards management functionality within Engineering Workbench. This release brings additional and enhanced standards management capabilities and multiple usability and personalization improvements based on direct user feedback and requests.

Building on the prior 1.2 release, Version 1.3 includes further essential capabilities for working with standards, codes and specifications in support of the eventual migration from IHS Standards Expert to Engineering Workbench. For example, Version 1.3 delivers Watch List functionality analogous to Standards Expert, as well as enhanced sharing capability for Projects.

In addition, Version 1.3 brings multiple user experience improvements and additional improvements in application security and performance.

Please note that Version 1.3 does not include all functionality equivalent to Standards Expert. Over the coming months, additional functionality will be added to Engineering Workbench to enhance your organization's ability to work with standards. An additional release is scheduled for January 2017, followed by the release of Engineering Workbench 2.0, scheduled for Q2 2017.\* Version 2.0 will include the full capabilities of Standards Expert, along with many powerful new capabilities for discovering, using and managing standards along with related technical content.

Through this "early visibility" to the standards-related capabilities in Version 1.3, current Engineering Workbench customers already can start using it as their standards management solution, while also taking advantage of the ability to use standards alongside eBooks, journals, or other content they access via Engineering Workbench.

Read more detail on the enhancements in Version 1.3 on the pages that follow. For assistance or training on IHS Engineering Workbench, please contact IHS Markit Customer Care for your region using the information below.
