Release Description

Version 1.02 is a quality release for the IHS Engineering Workbench 1.0 release, providing multiple functional enhancements, usability improvements and fixes. No user actions are required to start immediately enjoying the enhancements in Version 1.02.

This quality release addresses user requests for enhanced product usability and requests for improved administration with usage reports. Additional product enhancements have been made for increased stability, performance and functionality.

Read more detail on the enhancements in Version 1.02 on the pages that follow.

New Interim Page

Beginning with the Version 1.02 release, users of the IHS Knowledge Collections web service will be presented with an interim page (see below) offering to redirect them to Engineering Workbench and providing the initial announcement regarding retirement of the legacy service.

Important Information Regarding Your Subscription!

IHS Engineering Workbench will deliver improved Knowledge Collections as your ultimate digital reference library!

The new Engineering Workbench platform with hundreds of enhancements and new functionality will replace existing IHS Knowledge Collections web service.

All your current Knowledge Collections subscriptions are instantly accessible from the Engineering Workbench, which will enable you better productivity and knowledge discovery.
