

Component Forecast Analytics

Comprehensive supply-chain analytics enabling suppliers to grow vehicle component market share and assess future technologies.

Assessing the symbiotic relationship between automakers and suppliers requires new intelligence. IHS Markit Component Forecast Analytics provides timely, reliable, and comprehensive automotive component and technology forecasts from one of the most trusted sources in the industry.

Component Forecast Analytics helps:

- Gain transparency into competitors' books of business*
- Assess supplier plant locations and capacities*
- Source new opportunities through a six-year forecast calendar of new programs*
- Understand customers' purchasing strategies*
- Measure a supplier's market power in relation to its OEM partnerships*

*depending on subscription level

Three levels of granularity to fit your needs

OEM-Supplier relationships identified for over 600 components across 11 domains. Includes relational OEM-level database and five analytics. Available by domain.

6 year OEM-level forecasts for over 150 components
With OEM-level forecast database and 35+ analytics. Available by individual components.

6 year model-level forecasts for over 90 components
With model-level database and 75+ analytics. Available by component or subsystem. (some forecasts extend beyond 6 years)

From a leading provider of vehicle volume forecasts

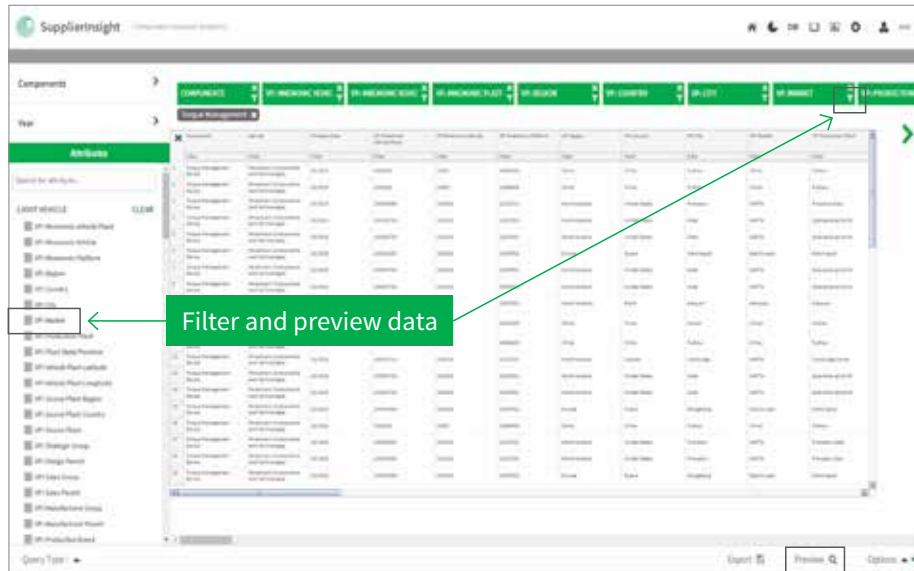

Our component forecasts are linked to our underlying Production and Powertrain Forecasts, allowing for greater timeliness of volume changes and consistency between datasets. Our knowledgeable, experienced industry experts average 12 years of automotive experience and are located in all key automotive and technology hubs around the world. Our research process includes peer-level interviews and discussions. Our extensive network of contacts within OEMs and suppliers provides enhanced intelligence; we talk to the experts rather than sending them questionnaires.

Data and analytics at your finger tips

Component Forecast Analytics is housed on our SupplierInsight portal and enables you to quickly and easily access insights or run your own queries.

Query Tool

Intuitive and easy to use

- Filter, order and preview data on screen
- Download your queried data into Excel
- Toggle between Installation vs. Production
- Save and load your queries for quick access to data

Analytics

Availability of analytics is based on solutions

Market Share
Assess relative market positioning over time

Targeting Index
Identify what suppliers will be bidding for

Contract Analysis
Identify key businesses of suppliers

Sourcing Structure
Review a specific OEM in a region

Supplier Book of Business
Review with whom suppliers will be generating revenue

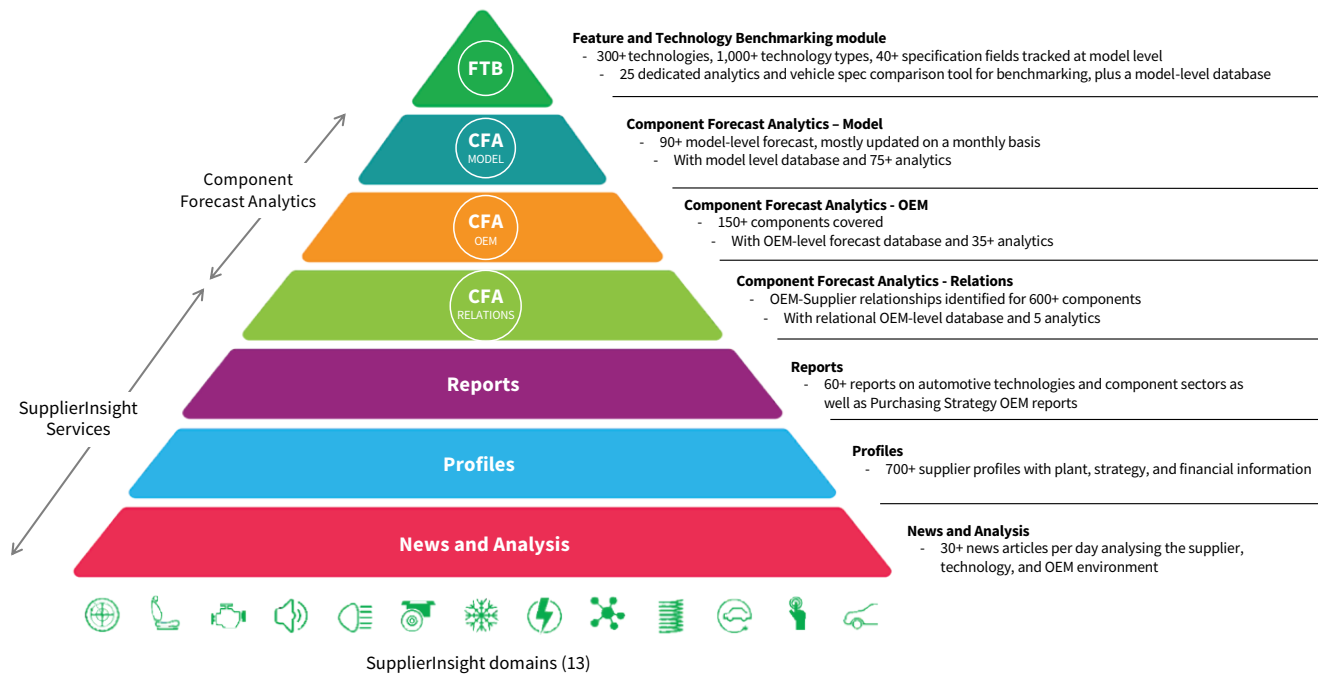

Technology Demand
Measure demand associated with selected technologies

Logistics Analysis
Understand OEM sourcing footprints
