Media & Advertising

Business intelligence focused on the dynamics, strategies and trends of today’s advertising, home entertainment and media markets.
Research Type Description

**INTELLIGENCE SERVICES**
Real-time access to continually updated market data and forecasts, analyst insights, topical research reports and analyst presentations. Interactive visual charting of data is also available through an online portal (TRAX).

**REPORTS**
Topical reports addressing key focus areas with in-depth analysis on market and technology trends.

**CUSTOM & CONSULTING**
Meaningful analysis and action-oriented recommendations for custom cases and consulting, building on extensive IHS data and recognized industry expertise.
Cinema

The cinema landscape continues to see marked changes in content distribution, packaging and production. At work today are various forces disrupting how movies are exhibited and consumed, including new distribution models, continuing advances in digital technology and the emergence of new growth markets such as Brazil, China and Russia. Such weighty financial and technical concerns bear down heavily on distributors and studios alike.

IHS Technology provides deep and expert perspectives on the modern cinema market, offering a critical framework and powerful means to track developments in the global film and theatrical industries.

CINEMA INTELLIGENCE SERVICE

The trusted source for comprehensive market intelligence. Delivers cogent analysis of performance metrics for specific companies and regions via accurate and methodically updated market data, focused insights and timely forecasts, based on a thorough knowledge of the cinema world.

Learn more
Video Media

Physical video is the majority source of global home entertainment spending, even if it is a sector facing challenges as digital delivery vehicles expand in popularity. Nonetheless, a clear-sighted understanding of the space via both consumer- and trade-level data remains essential in situating physical video’s true context within the larger global media market.

IHS Technology offers extensive coverage of the physical discs and hardware market, applicable to both music and video, for the most incisive take on the subject.

VIDEO MEDIA INTELLIGENCE SERVICE

The world’s most reliable and complete information on the global packaged video market. Offers a wealth of data on spending, revenue, sales and forecasts; along with expert reports on the business landscape surrounding physical video media, household video players and recorders, and music.

Learn more

VIDEO MEDIA INTELLIGENCE US SERVICE

Detailed, in-depth coverage of the US home entertainment market and its globally influential trends. Also includes key US video market data and forecasts on spending, revenue and sales, accompanying critical analyst insights and reports.

Digital Media

The consumption of digital media is now a conventional, commonplace artifact, ingrained into the fabric of everyday life for vast swathes of the world’s users. And thanks to the growth of broadband, consumers find it easier than ever to watch a streaming movie, interface with a mobile app or deploy social media online. But as market players, customer offerings and infrastructure investments for digital media continue to expand both regionally and globally, unsettling new models promise to shake up things even more.

IHS Technology offers you nuanced, compelling views into today’s sprawling online and digital media landscape—a vast panorama including broadband media, home entertainment, connected devices, mobile media, online music, social media and video on demand.
Digital Media
