# **BENEFITS** for Your GG&E Workflows

Today's interpreters have to focus on efficiencies and reducing costs. Is it any wonder they demand more from their day-to-day tools?

#### **BETTER COLLABORATION**

Hit the zone **95%** of the time with Kingdom Geosteering

Geologists and engineers work better together, avoid unproductive geology and make better predictions

Share common apps including free links to 3rd party applications

Work in a robust simultaneous multi-user environment Connect geology, geophysics, well, reservoir, land, production and completions data

#### **HIGHER PRODUCTIVITY**

### Work smarter, not harder and be the first to find new oil and gas opportunities

Benefit from an intuitive interface and user experience

Speed up cycle time with streamlined workflows Increase the pace of large project performance

Reduce waiting and bottleneck with shared data and workflows

#### EASE OF USE

Spend less time learning software and more time on geoscience and engineering

Simplify data connections to IHS Markit content Learn quickly with built-in videos, training and tutorials

Prevent errors and duplication with intuitive design Streamline collaboration with workflow automation

#### **MODERN DATA MANAGEMENT**

The power to manage 1,000,000+ wells

Stop wasting time on managing the data and get to the business of drilling

Avoid duplication, lost data, waiting and complexity Be more efficient with a true multi-user environment that doesn't bog down Simplify tasks with enterprise quality authoring, security, and backup

#### LOWER COST OF OWNERSHIP

Increase performance and scalability while lowering costs of high technology software and systems

Enterprise Control costs with pay for use, open access, volume discount programs **Teams** Save money on bundled technology, combined software and data, and lower costs for IT and infrastructure Individuals Just what consultants and geoscientists need to get the job done on a budget
