

IHS Markit™

IHS Markit: Intern Program

Learning is at the core of our program design. Spend the summer with us and you will leave with a variety of new skills and knowledge. We are committed to extending permanent offers of employment to all those who perform well over the program – here are few former interns who joined us after graduation!

Angela Zheng, New York University 2016

From day one when I was overwhelmed by tons of acronyms, and worried about where to have lunch for the next two months, to week ten when we confidently presented to a senior audience our bold ideas on Innovation and a multi-tiered data analysis project, my internship with IHS Markit was full of challenges and achievement. IHS Markit created an inviting environment for interns to learn different aspects of its business and network with a wide range of people, making staying in your comfort zone the last thing you would do. The broad exposure to company's products, people and culture over the summer helped me ask the right questions, find the right resources and not panic at the acronyms – they all make sense now!

Rohail Khan, Knox College 2016

Walking in to a very structured internship program straight out of college was a challenge that I undeniably relished. The entire internship was a learning experience providing me with ample opportunity to experiment with different roles within my department and figure out where I saw myself contributing the most. A year on from the end of my internship I find myself working as a Junior Product Manager for a product that is disrupting the FinTech market. IHS Markit promotes a culture that gives you freedom to be innovative while ensuring that you are sufficiently challenged with your day-to-day tasks. More important, IHS Markit makes me feel like an integral part of the team which is a great feeling to have when you are only a year out of college.

Kirsten Anderson, Hobart and William Smith Colleges 2016

I interned at Markit the summer of 2015 on the sales team. I worked closely with the Account Management team as well as the Fund Administrator team learning about the sales process and how to run client meetings. After my internship, I started full-time on Lead Generations Sales Team for 18 months before transitioning to the Fixed Income sales team, where I am today. My internship gave me the knowledge and experiences I needed to continue my progress my career in sales at IHS Markit.

WHAT CAN YOU EXPECT DURING YOUR SUMMER WITH US?

REAL WORK

You will be given a real job and form a key part of a team, undertaking work which is valuable to us and to you. You will have objectives, and your performance will be reviewed both mid-program and upon its completion. Essentially, you will be treated as if you work for us permanently.

GROUP PROJECT

Above and beyond your core job, you will work with interns in different locations on a project which poses a real business challenge. At the end of the project, you will present your findings to our CEO and other members of the senior management team. This is a highlight of the program, which will help drive your business acumen, team work and presentation skills to the next level.

LEARNING PROGRAM

In addition to on-the-job training, we organize regular structured learning sessions to help you develop core business skills. Business information meetings will give you exposure to the different areas of our business, the world of finance and enable you to meet various business leaders.

SOCIAL AND NETWORKING OPPORTUNITIES

Our intern program includes plenty of social events and networking opportunities and you will also participate in a volunteer project. In addition to your manager, you will be paired with a mentor and an intern 'buddy' based in an office in another country.

OPPORTUNITIES

In 2018, we plan to host interns in dozens of offices across the United States, Europe and Asia. Opportunities exist in a number of different functions, on internal teams as well as within our business lines.

FUNCTIONS	BUSINESS LINES	INTERNAL TEAMS
Consulting	Aerospace & Defense	Information Technology
Data Analytics	Automotive	Information Services
Economics	Chemicals	Finance
Human Resources	Economics & Country Risk	Human Resources
Marketing	Energy	Marketing
Operations	Financial Services	Operations
Product Management	Maritime	Product Management
