Near-Term Chemical Market Trends

**IHS Chemical Market Advisory Services (formerly CMAI's Market Advisory Services) provide the industry's most comprehensive price discovery, near-term analysis and forecasts of global chemical markets.** Through continual, personal contact with key industry sources, our research experts gather and study the salient data, which they then translate into valuable insights and forecasting advice. Clients receive the near-term outlook for major upstream and downstream market fundamentals, including prices, supply/demand, trade flows and cost structures.

Many clients choose to enhance their service with the longer-term perspective found in our World Analysis studies. These reports track country, regional and global supply/demand, trade and capacity for key chemical, fibers elastomers, and plastics markets through a long-term forecast and include history and base year data.

Manufacturers, raw material purchasers, chemical sales professionals, strategic planners, financial analysts, traders, logistics and end users depend on our Market Advisory Services to obtain accurate and unbiased near-term intelligence on the world's major chemical markets. Over 30 product-specific services spanning five basic chemical families offer the industry's most reliable and unbiased source of market insight and price forecasting on a global basis. Benefits include client access to our weekly updated pricing and economics database, including forecasts, and to our research experts for market advice directly related to the respective service. With industry-experienced professionals positioned around the globe, IHS Chemical provides clients vast regional coverage and support in a single service.

## Program Scope

The Market Advisory Services provide the latest, most accurate near-term market data and analysis for five basic chemical families. Depending on content and client needs, the services distribute daily, weekly, bi-weekly or monthly reports and/or data supplements.

### Report Contents

- Market prices (historical, current, forecast)
- Extensive expert commentary on prices, margins, trade, operational issues and future trends impacting markets
- Quarterly supply/demand balances and trade flows

## Global Economy and Energy Report

Customers receive this report at the end of each month. It contains discussion of global and regional economic trends, valuable crude oil and natural gas data, as well as insightful commentary from IHS Chemical analysts.

## Inquiry & Consulting Privileges

Subscribers receive reasonable access to IHS Chemical experienced industry professionals for market advice related to the service's respective industry. Furthermore, any data or graphic contained in the reports can be emailed in electronic format to customers upon request.
