

# Markit Desktop

Real-time and historical cross asset coverage of global financial markets

Markit Desktop now carries Markit's entire range of OTC fixed income data, including sovereign, corporate and municipal debt as well as structured finance and syndicated loans pricing.

The emphasis on liquidity in the market and capital and risk requirements have increased the need for investment professionals to understand relative value, assess credit performance and risk quality across a complex range of OTC asset classes.

Our Desktop brings together OTC asset valuations on one screen to allow for comparisons across data sets against new benchmarks to gain a detailed understanding of overall asset and sector performance. The incorporation of visualization and filtering tools allow for back testing against historical data and the ability to analyze and model underlying data in excel.

## Price discovery & analysis

Multiple screening tools with criteria based lookup on the entire pricing universe by region, sector, rating and many more.

## Cost effective market data delivery

The combination of Markit OTC pricing and a broad range of third party data and news provides a competitive application for managing data costs.

## Cross asset search

Easily search for corporates, indices and government data quickly with a complete cross asset pricing breakdown.

## Track performance

Set up your issuer universe by importing watch lists to view them on the pre-defined or customised screens.

## Modeling and analytics

A Microsoft Excel plug-in enables data sets to be integrated in real-time or with history for what-if analysis and analytics.

## Customise and share screens

The display application is flexible and allows fully customised screens that can also be shared amongst users.

**Asset managers**

Charting features make relative analysis available in detailed graphical formats. Filters allow users to screen securities by details such as asset class, liquidity score, region, sector and rating.

**Risk & product control**

Straightforward access to independent pricing and extensive history with Markit liquidity and credit sensitivity metrics across a number of OTC data sources.

**Sales & trading**

Real-time credit pricing and integrated price run management all on one screen. Sophisticated Excel plug-in for real-time modeling and P&L.

**Research**

Cross asset coverage allows for price exploration of government and corporate securities as well as Markit indices including Markit iTraxx, Markit CDX and Markit iBoxx.

**Market data**

Cost effective market data solution, fully hosted system with no on site infrastructure required. The software is self-updating and can be accessed from any location. Modular commercial models make it a cost effective option for any division.
