# Chartworks by Markit Digital

**Display rich interactive charts across all of your content platforms**

## Chartworks by Markit Digital makes it easy to implement financial charting on all your platforms.

The basics of charting are simple, but the challenge and complexity come in the details. From managing the datafeed to handling the nuances of axes, periodicity of data, time zones, holidays and splits – it is a large undertaking. Meanwhile, end users are more sophisticated and expect a rich and interactive charting experience.

Chartworks offers chart technology across HTML5, iOS, Android and images, and includes the data to power them. It builds on Markit Digital's 25+ years of experience building financial charts.

### Data integration

Data is included – we manage the charting data so you don't need to allocate time and resources for data management

### Charting expertise

Over 25 years of experience in building financial charts, with the design and development resource to get the complex details right

### Platform coverage

Supports HTML5 fully interactive charts, iOS and Android native charting SDK and static image based charts

### HTML5 Interactive Charts

It takes just a few lines of javascript to add charts to your web platforms.

### About Markit Digital

**iOS and Android charting SDK**

Add interactive charts to your iOS or Android application. Charts are fully interactive with pinch and zoom, upper and lower indicators as well as drawing tools.

**Static image based charts**

Pass in parameters to our API to create an image based chart that can be added to your website or mobile application.
