

Improve the Performance of your Operational Risk Program with IHS

Industry challenges

40% of engineers say their companies lose specialized knowledge and expertise faster than they gain it.*

32% of companies lack formal knowledge management systems and/or processes to identify, capture, manage and share critical data, documents and information.*

* IHS Pulse of Engineering survey

Did you know?

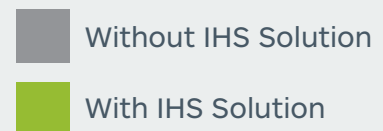

60% of all operational losses result from preventable causes

25-30% of an organization's annual costs will be wasted fixing repeat issues

50% of the engineering workforce is eligible for retirement in 2015

Move beyond the spreadsheet and drive ROI

Compared to non-specialized software, the **IHS Operational Risk Solution** can help deliver the following return on investment:

86% Study reduction time
by **applying best practices from historical data** – retain valuable corporate knowledge and intellectual property

90% Report reduction time
by **building reports** which are integrated and directly linked to internal systems to streamline efficiency

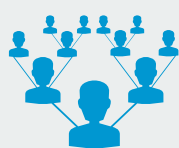

78% More cost effective
saving time and **providing data consistency** to reduce chances of error

*Times and costs are based on IHS estimates. Actual numbers may vary.

IHS has helped customers like you...

Centralize 18,000+ risk assessments to enable critical expert knowledge retention & sharing

Reduce time to roll up enterprise risk data into a report by up to 99% – e.g. from an estimated 2 hours to 2 minutes

Eliminate 1000s of disparate documents, stored in 45 different offices and centralize information to allow visibility into all operational risks
