Introduction to Monetizing shale Gas, Natural Gas and Coal in Petrochemicals

Workshop Overview

This interactive workshop will discuss the technology and markets of the burgeoning shale, natural gas and coal to liquids (CTL) value chain. Topics include a review of the main hydrocarbon fractions from natural gas and typical market behaviors for these hydrocarbon fractions as well as the sources and technology of shale gas production such as coals. The workshop will cover starting from natural gas and lignite gas production the value chain to olefins, methanol, to ethylene, ammonia, petroleums, and PV.

Who is it for?

The workshop is geared for those who want an overview of having a strong service component, and key factors to be successful in the specialty chemicals business.
Training Courses and Workshops
Maximizing the value of scarce resources is job number one in business. Never has there been so much change and it is imperative to train industry newcomers as well as keep seasoned professionals up to date on the latest industry issues and trends. IHS Chemical Training & Education programs are designed to unlock and maximize that human resource in the oil-gas, petrochemical, polymers, and plastics industry business as well as those involved in supporting allied industries. IHS is the leading information company providing comprehensive, insightful and expert analysis in key areas affecting the business. Industry and government authorities around the world use our products, services and solutions to make faster and more confident decisions.
IHS Chemical leverages the combined expertise of seasoned industry consultants from the former CMR, IHS Consulting (SRU) and Fumi & Gerti companies. IHS Chemical Training & Education courses and workshops cover the whole value chain, from refined products to petrochemical building blocks through to plastics and polymers processing and technology, markets and economics. The courses and workshops are continually evolving, ensuring the hottest topics are covered and workshop attendees are fully informed of the key issues facing the industry.
The courses and workshops are available either at public events or in-house company training. IHS Chemical Training & Education works closely with our global network of consultants to provide the training. Our highly knowledgeable industry experts provide context to the material through real-world industry examples. Workshops are typically given to a group of 10 – 30 people.
Courses and workshops are designed to be of interest and value to both technical and non-technical industry participants. Attendees represent a wide range of interest and value to both technical and non-technical industry participants. Attendees represent a wide range of industry participants. Attendees represent a wide range of companies and job functions. Attendees represent a wide range of job functions and companies.
We look forward to seeing you at one of our courses or workshops! For additional information please contact us directly or one of our regional trainers.
Thank you for your interest and happy training!

Dr. Jeffrey S. Plotkin
Vice President, IHS Chemical Training & Education

Understanding the Global Petrochemical Industry
Course Overview
A 3 day in-depth course by IHS Chemical Training & Education providing critical information and insights on the Petrochemical Industry. Changing market fundamentals, economics, value chains, marketing, risk management and corporate strategies will be covered. Attendees will gain insights into the underlying market fundamentals and how they can drive commerce. Attendees will also learn key insights into what influences market fundamentals.
Who is it for?
This three-day educational course is designed to be of interest and value to both technical and non-technical industry participants. Attendees represent a wide range of job functions and types of companies.
Course is designed to be of interest and value to technical, non-technical and experienced professionals from the oil and gas, petrochemical industry, or those in adjacent industries such as agriculture, oil gas, manufacturing automotive and technology, markets and economics.
The courses and workshops are continually evolving, ensuring the hottest topics are covered and workshop attendees are fully informed of the key issues facing the industry.
IHS Chemical Training & Education courses and workshops cover the whole value chain, from refined products to petrochemical building blocks through to plastics and polymers processing and technology, markets and economics. The courses and workshops are continually evolving, ensuring the hottest topics are covered and workshop attendees are fully informed of the key issues facing the industry.
