

# AccessEngineering

## Easily Access the Best Technical Reference from McGraw-Hill to Drive Better Engineering Decisions

AccessEngineering is a must-have collection of authoritative McGraw-Hill engineering reference content to help technical professionals create innovative solutions. Now available exclusively from IHS for the corporate market.

AccessEngineering provides technical professionals with seamless online access to a comprehensive library of critical, regularly updated engineering reference information. Supplemented with instructional videos, interactive tables and charts, and personalization tools, AccessEngineering helps engineers and other technical professionals drive innovation and create greater value for their organizations. IHS is the exclusive distributor of AccessEngineering to the corporate market.

AccessEngineering takes McGraw-Hill's peerless engineering content — trusted names like Perry's Chemical Engineers' Handbook, Marks' Standard Handbook for Mechanical Engineers, Roark's Formulas for Stress and Strain, as well as new titles such as Advanced MEMS Packaging and Energy Systems Engineering — and optimizes it for the digital age.

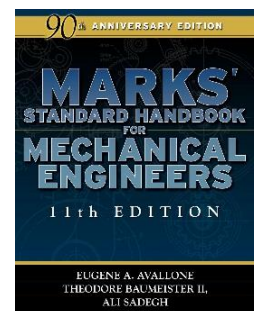

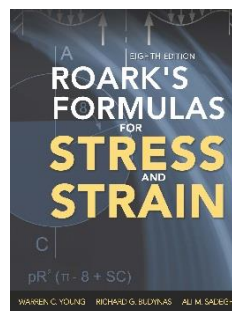

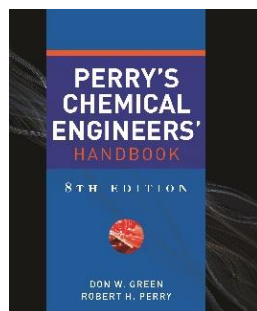

Drawing upon McGraw-Hill's 100-year expertise in creating distinguished engineering titles, AccessEngineering builds on them with filtered search, step-by-step "how to" videos, downloadable data, and interactive graphs. AccessEngineering is a "must-have" resource for technical professionals across industry sectors.

AccessEngineering helps engineers and other technical professionals drive innovation and create greater value for their organizations. And now IHS is the exclusive distributor of AccessEngineering to the corporate market.

### AccessEngineering

provides full-text access to titles covering key industries and engineering disciplines, including:

- Bio
- Business Skills
- Chemical
- Civil
- Communications
- Electrical/Electronics
- Energy/Petroleum
- Environmental/Sustainability
- Industrial
- Materials
- Mechanical
- Operations Management
- Schaum's Outlines
- Software

## CONTENT & CAPABILITIES

A world-class collection of multidisciplinary engineering content, including more than 700 widely used technical texts.

Fast, faceted search and interactive tools that enable rapid discovery of targeted content and hard-to-find data in tables and graphs.

Hundreds of white-boarded, "how to approach the problem" instructional videos demonstrating solutions to real-world engineering problems

3900+ interactive graphs, thousands of downloadable tables, as well as Excel spreadsheet calculator tools, making it easier than ever to use/analyze key data

A global engineering news feed delivering cutting-edge news across all major disciplines

Who Uses AccessEngineering	How?
Engineers and other technical professionals	Apply authoritative reference material in context as part of their daily workflow, keep their skills up-to-date, and expand their knowledge base.
Engineering Management	Drive innovation, accelerate time-to-market, and reduce risks and costs by providing technical staff with access to critical engineering reference information, backed up by powerful tools to increase their productivity and collaboration.
Corporate Librarians	Deliver comprehensive library of world-class engineering content to end users through a uniform, user-friendly platform, reducing training and increasing adoption, while also lowering costs.

## Powerful Features

Capabilities found on the AccessEngineering site include:

- Fast, faceted search ensures easy discoverability of information
- Instructional videos created by leading engineers demonstrate step-by-step solutions to real-world engineering problems
- Interactive graphs and downloadable tables allow for greater accuracy in readings and calculations
- News feed keeps users up-to-date with the latest engineering developments from around the world
- Mobile access allows users to search content on smartphones and tablets
- Personalization tools allow users to organize, annotate, and share

## Industries Covered

Technical professionals across all engineering fields can benefit from AccessEngineering's breadth and depth of multidisciplinary coverage, helping them to quickly discover the authoritative information they need to complete projects, enhance skills, and drive value and innovation.

Industry fields covered in AccessEngineering include major industry verticals:

- Aerospace/Defense
- Automotive
- Computing & Electrical
- Oil & Gas
- Architecture, Design, and Construction
- Industrial Equipment
- Specialty Chemical

## About IHS Markit

IHS Markit (Nasdaq: INFO) is a world leader in critical information, analytics and solutions for the major industries and markets that drive economies worldwide. The company delivers next-generation information, analytics and solutions to customers in business, finance and government, improving their operational efficiency and providing deep insights that lead to well-informed, confident decisions. IHS Markit has more than 50,000 key business and government customers, including 85 percent of the Fortune Global 500 and the world's leading financial institutions. Headquartered in London, IHS Markit is committed to sustainable, profitable growth.
